 168,175
 advanced combined treatment septic tank
 331
 advanced wastewater treatment
 technology..... 324,331
 air change rate... 041,048,063,064,156
 air conditioner ... 209,217,219,228,230
 air leakage..... 156
 air space 154,184
 air supply opening 260
 air vent 256,259
 airflow..... 052
 airflow blocking 137
 airflow inside the envelope 137
 airflow rate measurement 260
 airtight shutter 259
 airtight tape 148
 amahaji (semi-outdoor space with a deep
 overhang) 030,080,186
 amount of wasted water..... 286
 annual heating load..... 101
 annual mean global solar radiation ... 085
 annual performance factor of hot water
 supply (APF)..... 277,279
 annual power generation 085
 antagonistic action 025
 antifreeze solution 119
 antifreezing 107
 appropriate lighting for appropriate place
 288
 appropriate lighting for appropriate time
 288
 aquatic environmental protection..... 331
 architectural ingenuity 015
 architectural technique 020
 area without public sewage system
 334
 artificial climate chamber 350
 artificial environmental technology ... 012
 assisting residential solar generation
 installation..... 089
 attic ventilation 136,202
 auxiliary heat source
 103,111,113,115,117
 auxiliary heater..... 215,243
 awning 074,199

B

balanced flue water heater 274
 balanced ventilation 245,246
 ball tap 112
 bamboo blind 074,199
 barrier-free design features regarding the
 thermal environment 241
 basic items to be considered 034
 batt insulation 134
 bi-directional daylighting 067
 blind shutter 054,199
 blinds 074,197,199
 block with decorative openings
 030,077,179

blower fan 254
 blown-in insulation 134
 blown-in insulation method
 (blowing method) 150
 board insulation 134
 boiling mode 266,280
 branch duct 249
 branched piping system 283
 bu er space 097
 building conditions 343
 building coverage ratio of adjacent area
 027,045
 building density 026,027,044
 building envelope..... 124

C

ceiling fan 213,233
 ceiling insulation 149
 ceiling surface temperature 183
 ceiling with suspended joists 150
 central heating and cooling
 217,223,228,241
 circulating pump 115
 cloth drying area 030
 CO₂ emissions 008,012,352
 coe ficient for calculating CO₂ emissions
 353
 cold draft 235,240
 cold storage 047,098
 combined e ffective opening area
 051,058
 combined treatment septic tank 331
 combined treatment septic tank for
 nitrogen removal 331
 comfort 227
 comfortable 015
 compact fluorescent lamp 295
 component planning 035
 composting 333
 concrete envelope 170,181
 constant airflow mode..... 253
 construction 017
 consumer electronics energy reduction
 rate 315
 continuous ventilation..... 244
 convection heating (heating and cooling)
 228
 conventional consumer electronics ... 312
 conventional timber frame house..... 129
 Cool Earth 50 (Beautiful Star 50) ... 013
 cooling capacity 208,211
 cooling energy 024
 cooling energy reduction rate
 041,064,167,190,209,217
 cooling system 208
 COP 209,211,213,230,232,241
 correcting required illuminance 293
 cost..... 372,375,382
 cost evaluation..... 036,354
 covering 154
 CP (crime prevention) sticker 061
 cross ventilation quality 052
 cross ventilation route 050
 curtain 054,075,200

List of Authors

(Information below is as of November, 2009)

General editing

Kiyonori Miisho,
Shibaura Institute of Technology

Yuzo Sakamoto,
The University of Tokyo Graduate School

Overall coordination

Takao Sawachi,
Building Research Institute

Basic editing

Takayuki Akimoto,
Shibaura Institute of Technology

Tsukasa Iwata,
Building Research Institute

Kazuo Iwamura, Tokyo City University

Yasuo Kuwasawa,
Building Research Institute

Hiroaki Toyohara, Ministry of Land,
Infrastructure, Transport and Tourism

Main authors (Elemental technology)

Shigeki Nishizawa, National Institute for
Land and Infrastructure Management (3.1)

Takashi Kurabuchi,
Tokyo University of Science (3.1)

Yasuhiro Miki, National Institute for Land
and Infrastructure Management (3.2, 5.5)

Yuji Hori, University of Toyama (3.3, 5.6)

Yuichiro Kodama,
Kobe Design University (3.4)

Masayuki Mae, The University of Tokyo
Graduate School (3.5, 5.4)

Shizuo Iwamoto,
Kanagawa University (3.5, 5.4)

Hiroataka Suzuki,
Hokkaido Northern Regional Building Research
Institute (4.1, 4.2)

Takashi Inoue,
Tokyo University of Science (4.3)

Hiromi Habara,
Hiroshima Institute of Technology (5.1)

Hisashi Miura, National Institute for Land
and Infrastructure Management (5.2)

Masaki Tajima,
National Institute of Public Health (5.3)

Masayuki Otsuka,
Kanto Gakuin University (5.7)

Toshihiro Sankai,
Building Research Institute (5.7)

Main authors (Design evaluation procedure)

Kiyonori Miisho,
as previously mentioned (1.1)

Takao Sawachi,
as previously mentioned (1.2, 1.3, 2.4, 6.2)

Yasuhiko Okura, Architectural Laboratory
for Systems Environment Development (2.1, 2.3,
6.1)

Katsumi Yamaguchi,
Architectural Laboratory for Systems Environment
Development (1.4, 2.2, 6.3)

Authors (Elemental technology)

Hiromi Habara,
as previously mentioned (3.1)

Kenichi Miyajima AE-Solutions (3.1)

Yoshiki Nakamura, Tokyo Institute of
Technology Graduate School (3.2)

Katsumi Yamaguchi,
as previously mentioned (3.4)

Masahiko Sunagawa,
Sunagawa Arch. Env. Lab. Inc. (4.1)

Yoshinori Honma, Morioka Junior Col-
lege, Iwate Prefectural University (4.1, 4.2)
